

Kiernan Group Holdings invites you to experience the solution to a perplexing security concern at a Technology Day on Tuesday, Dec 8 at 1100, to introduce a dynamic product from our partner: Department 13

Department 13 is an innovative technology company focusing on wireless and mobile technologies to create solutions that transform communication, collaboration, and defense.

Department 13 has developed a commercial counter drone platform. Their platform uses sophisticated and novel methods to manipulate drones allowing users to automatically detect drones and stop, redirect, or safely land them. The Department 13 solution is ideal for both commercial and defense/security organizations to deal with the emerging threat of ubiquitous autonomous systems.

Department 13 has made game changing strides in developing a solution that is attractive relative to traditional electronic warfare systems since it does not affect other communications or involve kinetic options. The employment of low energy, target specific, drone control solution that does not use high power jamming technologies. The solution currently has the capability to intervene in threats from 90-95% of COTS drones.

The Department 13 solution is applicable to protecting key infrastructure from drones penetrating perimeters with hazardous payloads or on reconnaissance - VIP protection-protecting individual VIPs from threatening drones - Protecting airports from drones causing a flight hazard - Sporting Events in protecting broadcasting rights from unauthorized drones fitted with cameras - Prisons for preventing infiltration of illicit materials by drones - Protecting high population density events from rogue drones.

Please RSVP to Gary Greco (gsgreco@kiernan.co) by Dec 3 for details. For more details on Department 13, visit their website: www.department13.com
